PROJECTS

Project Title: ***A Framework for Electronic Health Record System for Developing Countries***

Description: Developed a cloud-based electronic health records system for secure, real-time access to patient records across devices. The system streamlines healthcare by eliminating physical records, enabling seamless, secure access for providers and patients, and enhancing continuity of care.

Project Title: ***Campus Lender***

Description: Campus Lender is a web-based system for on-campus students, enabling financial transactions without traditional bank details. Accessible at various campus locations via a unique ID, it simplifies payments in places like the canteen, library, and stationary store.
